DUPLEX  
ELLIPTIC

Or Double Spring

SKIRTS!

THEY ARE SOFT AND BREATHABLE.  
The most popular, but will never pre-  
pare where there are no ordinary sales are  
They are made of the best materials, and  
comes with that ELEGANCE OF SHAPE  
which has made the DUPLEX the best

STANDARD SKIRT  
OF THE FASHIONABLE WORLD.

1 WHOLESALE by the LEADING JOHNSON.  
For sale by all Retailers who sell FINEST  
MATERIALS.

WESTS, BRADLEY, & CAREY,  
Sole Owners of the Patent and exclusive Man-

UFACTURE and OFFICE

80, CHAMBERS, NEW YORK.

OPINIONS OF THE PRESS.

"This skirt is really the one thing desired, being  
capable of enduring any amount of washing and  
drying, and is perfectly safe from damage to its  
shape. *Godey's Magazine*.

"The Duplex is the latest  
improvement in skirts."

"They are carried in elegance, simplicity,  
and beauty."

"The Duplex is accepted as the latest  
step toward perfection in skirts. — *M. T. Chevalier*.

It gives the ordinary dress a style that  
can't be approached. — *Boden's Book*.

CAUTION.

A word of caution and to be very  
careful in buying, as there are many  
and notices that they are made by leading  
two stores, which can be easily  
seen by anyone who has a good  
eye for quality.

PRENTICE, HENDERSON, & OSBORNE,  
J. W. BRADLEY'S, C. H. HARRIS & CO., Democratic  
LOUISVILLE, March 1, 1866.

J. E. CAPEWELL  
WIND-GUARD AND AIR-HEATER  
COAL OIL LAMPS.

TESTED & 250000.

THE merits of this invention  
are in its ability to hang in any  
place and to be easily broken while used with  
the greatest safety.

No solder is required from heat to cold can crack  
or break, and without apparatus, in the most  
severe cold, making a steady light under a  
current of wind, and the lamp will not  
be extinguished by a current of wind.

It is the most perfect  
invention in lamps.

They are carried in elegance, simplicity,  
and beauty."

"The Duplex is accepted as the latest  
step toward perfection in skirts. — *M. T. Chevalier*.

It gives the ordinary dress a style that  
can't be approached. — *Boden's Book*.

## Local Items.

STEAM AROUND THE WORLD.—The beginning of the new year will witness the inauguration of unbroken steam communications around the globe, to be thenceforth prosecuted as regularly as the arrival and departure of European steamships at our wharves. The steamship Henry Chauncy will sail on the 10th of December for the Isthmus, will connect there with the Golden City for San Francisco, and from San Francisco, on the 1st day of January, the steamship Colorado will sail for Yokohama, in Japan, and Hong Kong, in China. It arrived at the latter port, the passenger vessels still to journey westward, he can be proselytized by the boats of the Peninsula and Oriental Company to Bombay and onward through the Red Sea to the Islands of Suez, which, crossed by rail, conducts to the British Isles of Mediterranean seafarers, tarrying at Malta and Gibraltar, and arrive in England, where a few hours of railway will enable passage to be taken in one of a dozen line of steamships for this country—the supposed point of departure.

So wonderful are the achievements of our busy age, and such is the progress of a century which sees every progress along with it. It is now nearly 365 years since the Cabots discovered North America; only 355 since Vasco Nunez de Balboa—

"With all his losses,  
Soot, weathering on the heights of Jason,"

as the Pacific was first revealed to European eyes; and but 345 years since Magellan first crossed the Pacific and sketched its gigantic proportions. It is, indeed, but a day in the chronology of nations since this country which unites the extremes of the old world, was organized, and hours count the period since Fulton found the power which is about being applied to such important results. And now we are at the very threshold of an event which is among the wonders of the age, and which coupled with the progressing Russian telegraph, is annexing Asia to our western borders as the same instrumentalities have already annexed Europe to our eastern.

Bank JAH.—Henry Thompson, alias Collins, who is still remanded, was arrested with Terrell, escaped from the Sheriff's jail about 3 o'clock on Monday afternoon. He cut through the wooden floor and then crawled beneath the iron floor and the wooden floor laid above it to the brick wall, where a hole was cut through about ten feet from the ground. The prison and two others escaped through this hole. The assistant jailer discovered the escape and pursued them, capturing one of the three in the outskirts of the city, but the other two escaped. It was expected that they would be caught, as they were closely followed.

The corn crop of the United States for the present year is estimated at the enormous amount of 1,639,000,000 bushels. It is stated that in the last twenty-five years the annual increase of the corn crop averaged 4 per cent, and in the three censuses last taken it is stated thus: In 1840, 375,271,775 bushels; in 1850, 592,671,104 bushels; and in 1860, 830,457,702 bushels. The crop is grown in the Mississippi valley, north of Tennessee.

Moss.—The Chief of Police received a letter yesterday from Mrs. Elizabeth Ryan, of Cincinnati, asking for information concerning her son, George Ryan, who has been missing from home for over two months. Mrs. Ryan is a highly widow, and would be exceedingly grateful for any tidings concerning her wandering boy.

Fire.—The alarm of fire given at 9 o'clock yesterday morning from Station C, corner of Fifteenth and Main, was caused by the partial burning of a frame kitchen attached to a cottage on Fifteenth street, between Main and Market. The fire was speedily extinguished by hand. The loss was trifling.

WATER PAPER.—The work of laying the additional mains on Main street progresses slowly. The workmen are now busy on the square between Eighth and Ninth. When completed it will form an important addition to the system of street mains for an uninterrupted supply of water.

THE LATE HURRICANE.—A subscriber at Lancaster, Ky., informs us that the effects of the storm last Sunday night in that town were quite severe. Many buildings were unrooted and partly blown down, trees uprooted, &c. From all accounts, the storm was the most violent that has visited this country for many years.

PERSONAL.—General Jeff C. Davis, commanding District of Kentucky, left yesterday for Chicago. He goes thither to be examined for the Colony in the regular army to which he has been appointed by the President.

PASSING COUNTERFEIT MONEY.—W. E. Fornish, indicted for passing counterfeit money, will be tried before the United States Court this morning.

An Important Capture.—Our readers will not soon forget the terrible tragedy that occurred some months ago in the city of Owensboro, Ky., some details of which we have heretofore kept secret for the furtherance of the ends of justice. We allude to the abduction of Lieut. Hampton and his wife, and the subsequent gang of unmitigated villains from Webster or Hopkins county, Ky. The horrid details of this terrible tragedy are still fresh in the minds of all who have heard of it. The young man helped himself to his wife's money, and the wife, with the aid of her husband, escaped, but was captured, and was held in a dark, damp, and wretched room by H. W. Bassett's drug store.

PLACES OF BUSINESS ON DEADERICK STREET.—Republican Banner office, Thos. J. C. W. Chidress, J. P. Dunlap, Sam'l. H. Johnson, J. C. Johnson, J. W. Malone, D. A. Wilkin, Jas. Chamberlain, J. GREAT FIRE IN NASHVILLE.  
A MILLION DOLLARS WORTH OF PROPERTY DESTROYED.

## THE CONFLAGRATION STILL IN PROGRESS.

From the Nashville Dispatch.

We write with the sound of crackling flames in our ears, and the roar of smoke and destruction, conflagrations over整个 Nashville, rolling on in its wild, unabated and furious career.

About one o'clock this morning, fire broke out in or near the drug store of W. C. Steiner, and soon spread over the entire city. It was rapidly on every side. But a short time later, the steamship Colorado, having passed through this city the other day, had by the overland route for ports unknown. His townsmen hope he may reach his destination and continue to reside there.

ACCIDENTAL ACCIDENTAL SHOT.—We have another account of the first shot, and is now a shout of the first alarm. He shot a nail in Mr. Sterling last evening, a soldier of his, passing through this city the other day, had by the overland route for ports unknown. His townsmen hope he may reach his destination and continue to reside there.

ACCIDENTAL SHOT.—We have another account of the first shot, and is now a shout of the first alarm. He shot a nail in Mr. Sterling last evening, a soldier of his, passing through this city the other day, had by the overland route for ports unknown.
